# Specific Objectives

1

Developing green and entrepreneurial skills to people holding or wanting to create a sustainable enterprise.

2

Development of exemplary learning materials for start-uppers and entrepreneurs, which will give an initial access to the future sustainable business environment.

3

Foster capacity building through innovative approaches by developing skills and sustainable business models.

**GreenComp Enterprises project aims to develop the skills and competences of start-uppers and entrepreneurs in sustainable entrepreneurship, enhancing the creation of innovative green and ethical enterprises across Europe, that will foster the production of eco-friendly products.**

4

Boosting the start-up of new sustainable enterprises in post Covid-19 era.

5

Fighting against climate change, through the guidance in sustainable entrepreneurship and the production of eco-friendly products.

6

Promoting business sustainability at national, regional and European levels.
